Dear Sir/Madame,

I am writing today in response to FCC Chairman Tom Wheeler's recently announced proposal to raise the E-Rate funding cap by \$1.5 billion. The E-Rate program currently represents the only source of federal funding aimed at educational technology and is critical in providing discounts to assist schools to obtain affordable telecommunications and internet access. As Superintendent for Monroe County Community School Corporation, Bloomington Indiana, I strongly support the infusion of the additional funding, and urge you to do the same.

Monroe County Community School Corporation has twenty pre-schools, fourteen elementary schools, three middle schools, four high schools, and one adult learning center serving over 10,000 students. Our schools serve a broad scope of student demographics in urban settings. Our free and reduced lunch population is 37% overall, with several elementary schools in our district ranging from 47- 88% free and reduced.

Our e-rate dollars are used to fund technology and will support 1:1 Technology in the near future. Additional E-rate funds would support additional technology devices and infrastructure going forward with a corporation wide 1:1 Technology Initiative and would minimize the amount of debt that would be issued to maintain the technology programs on an on-going basis as equipment and infrastructure becomes outdated.

To raise the cap of the E-Rate program by \$1.5 billion, the Universal Service Fund fee will increase by 16 cents per month per account. 16 additional cents per month—less than half a penny per day—totals to an additional \$1.92 per year, approximately the cost of a cup of coffee. This proposal is both reasonable and justified, asking contributors to forgo one cup of coffee over the course of a year to ensure that our nation's schools and libraries are connected to the internet in a way that supports 21st century learning and prepares them for post-secondary opportunity.

No one questions that it is time to ensure that our libraries and schools are connected with the quality of connectivity that is sufficient and scalable for today's ever-growing connectivity needs. In less than twenty years since Congress established the program, E-Rate played a critical role in transforming levels of connectivity from less than one-quarter of schools and libraries to nearly all connected today. The E-Rate program's work is not done: Achieving the laudable broadband goals adopted by the Commission in July will require additional investment. The biggest obstacle the E-Rate program faces, even with the recent changes, remains the strain of increasing demand for E-Rate-supported services and persistently low funding.

Mr. Mike Watson, Director of eLearning Strategies

The single most effective step the FCC can take to bolster E-Rate's current and future success is to ensure that the program's funding is adequate to support, in a sustainable manner, the program's changes and goals as adopted in July. Chairman Wheeler's proposal does just that, representing a deliberate effort to expand educational opportunities for our nation's students. By focusing on high-capacity broadband connections to the internet (particularly those in rural communities) and providing sustained, additional funding to the E-Rate program, the modernized E-Rate will ensure the nation's schools—including mine—are able to keep pace with ever increasing connectivity needs.

Thank you for considering my response as you move forward with your decision on the E-Rate program and its funding. I applaud Chairman Wheeler and the FCC for its continued efforts to protect the already oversubscribed E-Rate program by ensuring the future of this successful program.

Professionally Yours,

Dr. Judith A. DeMuth
Superintendent
